

DuPont Refinish

“The brand that helps you be more productive”

DuPont Refinish

More than just paint ...

The DuPont corporation has a long history in developing and supplying unique quality coatings to the automotive industry.

While being part of the DuPont corporation, DuPont Refinish is on its own the world's leading manufacturer of coatings for aftermarket car repair, offering the same advanced, often patented, technology to the refinishing professional.

Complete solutions are available for every type of repair, on any type of substrate, on any type of vehicle. The different components of our various coatings can all be efficiently used on the same mixing machine, while our powerful

colour formulation tools make short work of accurately matching an exact colour. Add to this the ease of use and reduction in flash times you can achieve with our products, and you'll see what superior quality and increased productivity can do for your throughput rate, not to mention your bottom line.

Next to supplying you with leading edge products and systems, DuPont Refinish will be delighted to assist you in optimising any aspect of your business. From the spray booth and the stock room to the front office; from planning to operations and management, we can help with analysis and advice, or any of our training programmes. DuPont Refinish is committed to the success of your business, just tell us how we can help!

DuPont™ Ultra Productive VOC Clear 3750S

Ultimate speed, ultimate productivity

A small repair may not seem like much, but it's small repairs that make up a large part of your weekly workload and revenue.

Although small, they do take a bit of work, and they take quite a lot of time when you add them all together.

It's precisely for those reasons that DuPont Refinish has developed the new DuPont™ Ultra Productive VOC Clear 3750S.

Specially formulated to be the fastest drying clearcoat available in our range, it will save time on every small repair job, making significant savings in your work process.

The secret lies in DuPont's patented HyperCure™ technology, which reduces drying times to an absolute minimum. This not only means there's no time lost waiting for paint to dry, but also no chance of anything happening to that paint before it's dry. Quick to apply and quick to finish off, that's HyperCure™ in a nutshell.

With DuPont™ Ultra Productive VOC Clear 3750S, everybody benefits: your customers will get a good result and can have their vehicle returned sooner, while you will love the increase in throughput you can achieve. And being fully VOC-compliant, DuPont Refinish clear 3750S means you're up-to-speed with the latest environmental regulations as well.

- Fastest-drying clearcoat available in our offering
- Minimal dust-free time prevents surface defects from air contamination
- 1.5 coats win on time, save on product
- Fast work for faster throughput
- Good, durable, high-build finish
- Exceptional resistance to marring, chemicals and weather

Keep the quality while boosting efficiency

Because of its speed, DuPont™ Ultra Productive VOC Clear 3750S is ideal for spot and panel repairs without compromising quality. For DuPont Refinish clear 3750S delivers an attractive, shiny finish that can be buffed to exactly match the original paint next to the repair. And it's durable too: striking the perfect balance between physical drying and chemical curing, the HyperCure™ process results in an exceptionally tough coating that's highly resistant to weathering, chemicals and scratches.

Using DuPont Refinish clear 3750S is easy as well as quick. It can be mixed to allow for differences in climate and ambient temperature, so you can always be sure it's quick enough without being too quick to dry. With its excellent viscosity and flow, DuPont Refinish clear 3750S provides easy wetting on DuPont Refinish basecoats. Needing little or no intermediate flash time, you can simply spray an economical

1.5 coats without delay and then bake or IR-dry almost immediately. Once dry it's easy to polish, which saves time and labour while producing a truly invisible repair.

Accelerated System

Mixing Ratio	Spot and Panel	
		
	3750S	Volume 3
	XK203	Weight 100
	431R/XB387	1 36
		0.4 12

Number of coats

	1.5
---	-----

Flash time

	0 - 5 min between coats. 0 - 5 min before bake (depends on spray booth).
---	---

Drying	431R	20°C	15 min x 60°C
	Dust-free	15 min	imm.
	Dry to handle	2 hr	imm.
	Tape-free	6 hr	15 min
	XB387	20°C	15 min x 60°C
	Dust-free	30 min	imm.
	Dry to handle	3 hr	imm.
	Tape-free	8 hr	30 min

Service benefits

- Ultra productive 2-component high solids clear
- Used in clear over base paint systems
- For rapid spot and panel repairs
- Supports air dry, low-bake or IR drying
- Quick application, excellent polishability
- Low emission for VOC-compliance

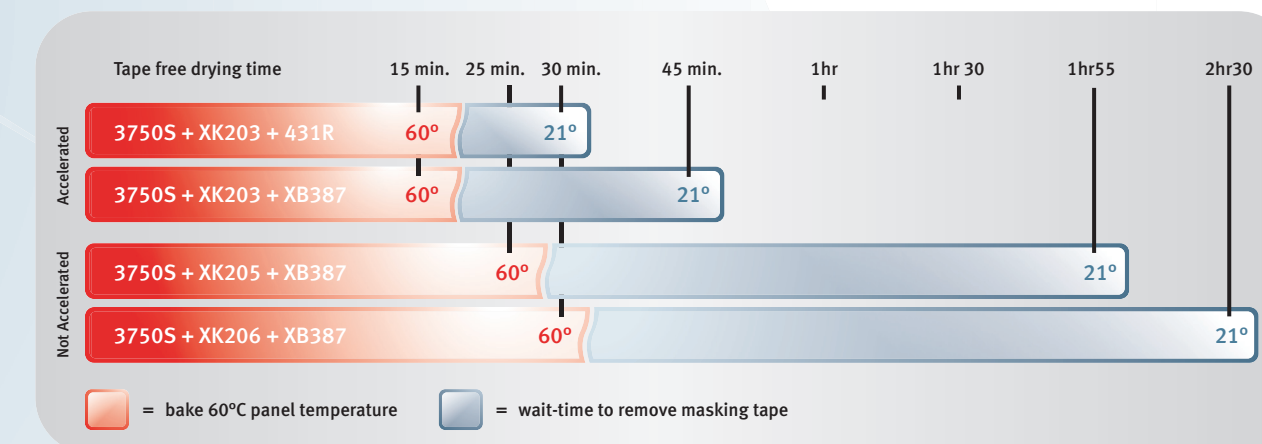

- Low emission for VOC-compliance
- Quick application, excellent polishability
- Supports air dry, low-bake or IR drying

30% reduced consumption

Due to its high-solids formulation, the new DuPont™ Ultra Productive VOC Clear 3750S will cover more surface with the same amount of product. Which means you can expect to save 30% of product compared to using traditional medium-solids clearcoats.

Fast drying times

3750S offers a wide window of available drying times, allowing you full flexibility in your workflow. Overall drying times are greatly reduced, thus speeding up your throughput while saving energy from lamps or oven.

DuPont™ Ultra Productive VOC Clear 3750S combines with three different activators for maximum flexibility of application, curing times and operating temperatures. The same activators also work with other DuPont Refinish coating systems, minimising stock levels and allowing maximum efficiency in use.
