- Exclusive on-screen colour rendering technology
- Reporting on consumption, accuracy and productivity
- Stock management feature to track and to maintain inventory

*The miracles of science™*

**DuPont Refinish**  
More than just paint ...

# ColorNet® Pro

## Productivity in colour matching and management

ColorNet® Pro by DuPont Refinish is one of the most complete colour retrieval and productivity management system. This powerful software will quickly and accurately match any paint colour and exactly calculate the required amount of paint. ColorNet® Pro also provides extensive reports on paint consumption and paintshop productivity, while the stock management function will track and report on product inventory as well.

*ColorNet® Pro makes very short work of every colour that needs matching, boosting productivity and accuracy in one go.*

### Advanced retrieval and matching on the shop floor

ColorNet® Pro finds colours fast. One single search retrieves every possible formula, even from partial information, including your own. New, exclusive on-screen colour rendering technology presents accurate colours on the digital OEM colour display for quick identification. And you get the latest formulas from the DuPont Refinish website, ready for use. To keep things simple you can save your most-used product mixes to a Quick Select shortlist too. Connect your ChromaVision® spectrophotometer and ColorNet® Pro will match the actual vehicle colour you just measured. Hook up your scales and ColorNet® Pro will help with exact weighing, even telling you how much paint you need for a particular body panel. By saving you time and helping avoid possible errors at every stage, ColorNet® Pro will really boost productivity while helping to economise on paint consumption.

### Advanced reporting and control for your management

ColorNet® Pro keeps track of everything. It has powerful reports, which can be sorted, filtered and exported for extensive analysis. Get a detailed insight into your bodyshop's performance by monitoring productivity, accuracy and consumption for each job or each painter. Or compile significant statistics by combining reports on cost and productivity over longer periods. ColorNet® Pro will also keep track of product stocks and remind you when to reorder. Use ColorNet® Pro to keep your finger on the pulse, and nothing will escape your attention.

### Features

- State-of-the-art colour accuracy management
- Powerful, comprehensive colour search
- User-friendly interface and processes
- Accurate digital on-screen colour rendering
- Volume suggestion function
- Password protection settings
- Extensive reporting functions
- Stock management function

### Benefits

- Total colour control from matching to monitoring
- Faster, more accurate colour formula retrieval
- Significantly saves time and increases productivity
- Quick and easy colour identification
- Prepare the right amount of paint for each job
- Control weighing process and identify painters
- Analyse and improve consumption and productivity
- Track inventory and know when stocks are low

*Exclusive on-screen colour rendering presents accurate OEM colours for easy identification. Turning these into digital colour-cards saves time again and again.*
