Boost Productivity and Customer Satisfaction with DuPont Refinish

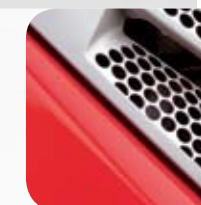

DuPont Refinish More than just paint ...

Formulated for ease of use and maximum efficiency,
DuPont Refinish products are designed to improve your
productivity, your throughput and your revenue.

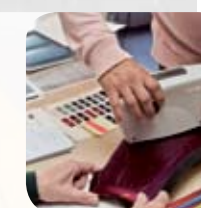

Benefit from leading-edge paint technology by DuPont
Refinish - the very same technology DuPont supplies to major
automotive manufacturers. Having been at the forefront of
automotive paint development for many decades,
DuPont Refinish brings you superior products and a wealth
of knowledge on every aspect of your business.

Our comprehensive range of professional paint systems offers
a solution – usually OEM-approved – to deliver a quality result
on any component, for any type of vehicle. And with our team
of experienced paint professionals, DuPont Refinish can also
boost your business with advice and assistance. From training
your painters, to supporting your management and marketing,
we have proven solutions to increase your productivity and
profitability.

Any component for
any type of vehicle

Advice and
assistance for
your business

Over 200 years
of experience

Go Pro with DuPont Refinish Products and Systems

 VOC
 Non-VOC

From basic putty to final clearcoat, DuPont Refinish products offer complete solutions for every stage of any paint job, regardless of size. You can be certain of delivering an excellent result in the most efficient way; from simple spot repairs on a single panel to a complete repaint on a heavy-duty vehicle and anything inbetween. Even small industrial repairs on bicycles, refrigerators, steel doors etc are easy to handle: the system is that versatile.

Single components are formulated to fit into different paint systems, making the most economical use of your inventory – just changing the binder allows a whole new range of applications with the same concentrated DuPont™ colour tints. Different types and qualities of paint can be prepared on one single mixing machine, again delivering efficiency through increased versatility.

Most DuPont Refinish coatings can be mixed to dry quickly for increased throughput. Many can also be used in 1.5 coat applications, saving you product as well as time.

Colour matching is both easy and accurate, using efficient retrieval systems and powerful tools like ChromaVision™. Paint can be quickly prepared to the exact OEM colour specifications while anything else can be easily duplicated, be it faded paint, special fleet colours, or even metallics and pearls.

From invisible repairs to eye-catching custom paint, DuPont Refinish coatings are your best choice: improve quality and durability for your customers, while improving productivity for yourself.

Being at the top of our profession, DuPont Refinish can assist you in reaching - and staying at - the top of yours. Through Bodyshop Pro, a package of personalised consultancy services , we can help you increase productivity and efficiency in any area of your business, from the workflow to the back office and from stock management to sales.

DuPont Refinish offers a comprehensive series of workshops and training courses for bodyshop professionals, available in our own Training Centres at locations throughout the world or even at your own facilities. We also offer consultancy services to analyse your operations, followed by advice and assistance in making these more effective.

To help you tell your customers about the good work you offer, Bodyshop Pro also includes powerful marketing programmes, culminating in the Five Star network for bodyshops that delivers the highest professional quality.

Through the DuPont Refinish website we provide clients with a wealth of data on our products and how to use them, as well as industry news and the latest colour specifications.

Whatever the size of your operation, DuPont Refinish is committed to your success.
