CP7749 – Introducing S2S Technology

Side-to-side (S2S) Technology is the industry's best forward/reverse functionality, located directly above the trigger for "true" one-handed operating.

Chicago Pneumatic, a global leader in the design, manufacture and distribution of high-performance aftermarket tools, accessories and compressors, has brought to market the world's first and only ½ inch pneumatic impact wrench with side-to-side (S2S) Technology for forward/reverse functionality located directly above the trigger. This revolutionary design provides the easiest to use and most convenient forward/reverse system ever engineered in a pneumatic impact wrench. The CP7749 is well balanced, light weight at only 1.98 kg (4.37 pounds), and delivers 980 Nm (725 ft.lbs) of ultimate torque.

CP7749 Features

Discover all of the unique features of the new impact wrench from Chicago Pneumatic.
