McLaren 650S

650S SPIDER

INTRODUCTION

Designed from the outset to offer outstanding performance with class-leading refinement, when creating the McLaren 650S we were able to put convention to one side and innovate, from the inside out. Our intelligent design solutions deliver functionality without compromising form meaning every switch, dial and component is bespoke to McLaren specification, meeting our own obsessively high standards.

The McLaren 650S is built around the lightweight one-piece, carbon fibre MonoCell partnered with the latest iteration of the McLaren M838T V8 twin-turbocharged 3.8 litre engine. Combined with evolutions of our pioneering ProActive Chassis Control (PCC) and Brake Steer systems, the McLaren 650S is the culmination of our tireless obsession with weight and detail. With cutting-edge tyre technology and offering greater levels of equipment than any McLaren before it, the McLaren 650S offers exceptional out-and-out performance as well as peerless levels of quality, safety, comfort, and efficiency.
