FAST MOVING
PARTS CATALOG

 **TOYOTA**

**HALF
THE PRICE
IS ONLY
HALF THE
STORY.**

MORE GENUINE TOYOTA RADIATORS, NOW AT HALF THE PRICE.¹

Now you've got competitively-priced Genuine Toyota Radiators to fit 77% of Toyota UIOs.² **But the price is only half the story.**

COOLING PERFORMANCE.

In cooling performance tests, Genuine Toyota Radiators outperformed imitations in both durability and performance.³ Some aftermarket imitations delivered 15% less cooling performance, not meeting minimum Toyota standard.

FIT AND FUNCTION.

Some top imitation brands may over-consolidate parts,³ rather than meeting precise vehicle specifications, leaving engine integrity at risk. Only Genuine Toyota-engineered quality and fit assure the right fit and function every time.

DURABILITY.

Top imitation brands leaked in OE pressure and thermal stress tests.³ Genuine Toyota Radiators are designed to withstand the boiling point over 10,000 times, while some top imitations failed in about half the time.

COMPETITIVELY PRICED.

Best of all, Genuine Toyota Radiators offer Genuine Toyota quality, fit and performance priced competitively with aftermarket imitations.

WARRANTY.

Made to Toyota specifications, these radiators maintain the vehicle integrity that Toyota owners expect and feature the Genuine Toyota Parts comprehensive 12-month, unlimited mileage warranty.

¹ Prices reduced by an average of approximately 50%, price reduction for specific models may vary. ² Toyota vehicles in operation from three to ten years old. ³ Independent testing conducted by DENSO Corporation. ⁴ Available 11/13/08.

GENUINE TOYOTA REMAN CV AXLES

Good as New — Without the Cost of New!

UNIT TESTING

Each CV unit is 100% tested and inspected for quality, functionality and OEM length specifications. Therefore the axle will fit and function the first time — every time.

UNIT TESTING INCLUDES:

- OE BOOTS
- OE GREASE
- SPLINES
- THREADS
- SHAFTS
- CLAMPS
- DUST SHIELDS
- OUTER JOINT

Genuine Toyota Reman CV Axles are made with superior materials compared to other aftermarket axles. Therefore you can install these axles with confidence that they will outperform any aftermarket axle available.

FACTS ABOUT GENUINE TOYOTA REMAN PARTS

- Remanufactured, not rebuilt, using original Toyota components.
- Backed by a 12-month unlimited mileage warranty.
- High quality at a lower cost than OE parts.
- Since cores are recycled rather than discarded, resources are conserved and landfill is reduced.

HOW TO USE FAST MOVING PARTS CATALOG

FAST MOVING PARTS CATALOG SECTION

1. This Fast Moving Parts Catalog is organized by VEHICLE MODEL. To use this catalog, locate the appropriate VEHICLE, then the PART FAMILY for the part you need.
2. The following VEHICLE MODELS are covered in this book:

• Avalon	• Paseo	• Tercel
• Camry/HV	• Previa	• Truck/4Runner
• Celica	• Prius	• Tundra
• Corolla	• RAV4	• Venza
• Cressida	• RAV4 EV	• Yaris
• Echo	• Sequoia	• Scion-tC
• FJ Cruiser	• Sienna	• Scion-xA
• Highlander/HV	• Solara	• Scion-xB
• Land Cruiser	• Supra	• Scion-xD
• Matrix	• T100	
• MR2/MR2 Spyder	• Tacoma	
3. The following PART FAMILIES are included in each VEHICLE MODEL.

• BELTS	• EXHAUST
• BRAKES	• FILTERS
• CLUTCH	• SUSPENSION
• ELECTRICAL	• TRANSMISSIONS
• ENGINE & A/C PARTS	• WIPER PARTS
4. Within each VEHICLE MODEL, Products are organized by PART FAMILY, then specific Part. The vehicle MODEL NUMBERS are listed chronologically by starting PRODUCTION DATE.
 - MODEL NUMBER information can be found on the VEHICLE IDENTIFICATION PLATE OR LABEL.
 - PRODUCTION DATE information can be found on the PLATE or LABEL attached to the DOOR or DOOR PILLAR of each vehicle. The PRODUCTION DATE is designated by a 4 digit number, with the YEAR listed FIRST and MONTH listed SECOND, i.e., 9001 means year 1990, month 1 (January).
5. All part numbers and applications are based on information available as of **September 30, 2009**. All applicable part numbers have been listed, including parts which may not have been available at the time of printing.
6. The example on the following page is a generalized sample from the catalog. The actual format may vary slightly by product.

Produced by Toyota Customer Services, Strategic Planning Department
Toyota Motor Sales, U.S.A., Inc. Torrance, California 90501

This catalog is produced solely for use as an information sales aid and all information contained herein was up-to-date at the time of publication. Toyota reserves the right to alter, withdraw or discontinue the availability of any part or accessory listed in this catalog without prior notice. Reliance upon the information in this catalog creates no liability for Toyota, its employees, representatives or agents.

MODEL NO.	COMMENTS	PROD. DATES	ENGINE	PART NO.	CUST. ID#
-----------	----------	-------------	--------	----------	-----------

AIR FILTERS

VZV21		8802-9108	2VZFE	17801-74020-83	FA-18
SXV20,MCV20..NAP		9607-	5SFE,1MZFE	17801-03010	

Production Date Starting - Ending Periods

Example: 8802-9108 — Means that the part is applicable to vehicle models (or engines) produced between February 1988 and up to August 1991.

9607- — Means that the part is applicable to vehicle models (or engines) produced July 1996 and onward.

NOTE:

There may be cases in which a vehicle's production date coincides with both a production date starting period and a production date ending period. This would be the case in the above example if the vehicle production date were 9108. In these cases, please review the applicable revision reference information to determine the correct part number.

MISCELLANEOUS

AIR FILTERS

Let's Clean The Air

Genuine Toyota air filters set a clean standard for fit, durability and performance.

■ Triple-layer filtering element captures most types of contaminants while maintaining proper airflow throughout the life of the filter.

■ Needle punched construction is used because of its superior ability to trap and retain dirt and dust.

MISCELLANEOUS

TRUESTART BATTERIES

Why Your Battery Should be a Genuine Toyota Replacement:

- The only warranty replacement battery approved for your Toyota vehicle.
- The exceptional 84-Month Warranty! Includes Towing and Installation Labor.
- Coast-to-Coast warranty service at more than 1,200 locations!
- Meets or exceeds Toyota specifications for all vehicles.
- 24-month FREE Replacement.
- 60-month prororation in a simple two tier priced plan.

Features Include:

- Matrix Radial Grids to help your battery meet today's high current starting demands.
- A patented lead alloy feature that reduces corrosion of lead parts and extends the life of your battery.
- The right balance of Cold Cranking Amps and Reserve Capacity to provide power and cranking ability time after time.
- A Negative Plate Paste Expander that reduces damage caused by high under-hood temperature or extreme heat.

Tip: If your car won't start or stalls frequently, it may be time for a new battery. Ask for a Genuine Toyota Replacement battery.

All Toyota vehicles manufactured in Japan come with a Japan Industrial Standard (JIS) specification battery. U.S. battery manufacturers use a different specification standard called Battery Council International (BCI). The chart below can be used as an aid in determining the best fit replacement BCI specification batteries for JIS specification batteries.

NOTES:

- It is advisable to check the size of the battery installed in the vehicle to determine the proper replacement battery.
- BCI#: Battery Council International number
- Vehicle equipped with "ESP System": Use adaptor kit P/N 00019-20002.

MISCELLANEOUS

TRUE-2 BATTERIES

To strike a balance between **QUALITY** and **PRICE**, choose the **TRUE-2**

Features and Benefits: Ask for a Genuine Toyota Replacement battery.

- A competitive 60-Month Warranty!
- 18-month FREE Replacement.
- Coast-to-Coast warranty service at over 1,200 locations.
- High vibrations resistance.
- A great non-warranty replacement alternative.
- 42-month proration in two tier priced plan
- Built to top industry standards.
- A Genuine Toyota battery representing quality, durability and reliability.

Tip: If your car won't start or stalls frequently, it may be time for a new battery.

All Toyota vehicles manufactured in Japan come with a Japan Industrial Standard (JIS) specification battery. U.S. battery manufacturers use a different specification standard called Battery Council International (BCI). The chart below can be used as an aid in determining the best fit replacement BCI specification batteries for JIS specification batteries.

P – Pollen Filter: The standard filter designed to capture larger particles including pollen, dust, and other allergens.

EE – Electrostatic Filter: While it functions like a Pollen Filter, it also holds a static charge that captures smaller particles such as asbestos and tire dust.

CH - Premium Charcoal Filter: Features a 2 layer filtering structure that helps it to capture particles and removes odor.

OIL FILTERS

Longer Life Through Clean Living

Genuine Toyota oil filters are equipped with these features:

- Toyota approved Filter Element:
 - effectively filters contaminants while meeting all Toyota specifications for flow.
- Bypass Valve:
 - pressure relief valve that opens only when the filter is clogged and allows oil to flow to the engine.

- Anti-Drainback Valve:
 - helps keep oil from draining into the oil pan during non-use
 - prevents dry engine starts and wear
 - helps maximize engine operating life
- Unique Construction
 - Precision base plate with locking O-Ring ensures tight seal

SPARK PLUG APPLICATION CHART

Genuine Toyota Spark Plugs Outdistance The Competition

Your Toyota comes equipped with the parts you need to get the performance you want-right down to the spark plugs.

Platinum-Tipped Plugs For High-Performance Engines
If your Toyota has a high-performance, dual overhead cam engine, you need genuine Toyota platinum-tipped spark plugs. They're designed to take the extra heat these engines

generate, and they go farther, longer - up to 60,000 miles-before needing replacement.

Remanufactured Parts Core Return Procedures

Revised 10/10/08

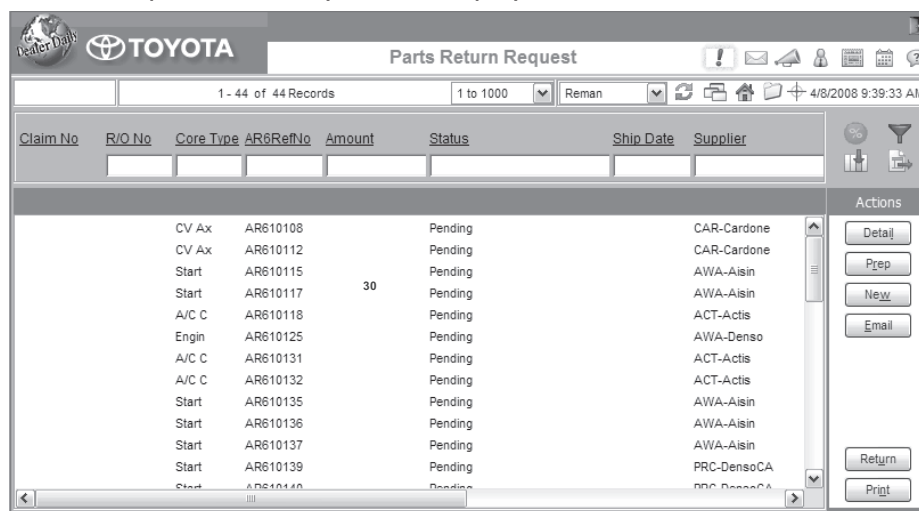

Toyota PRS – Remanufactured Parts Core Return (QRC)

A Dealer Initiated Reman Part Return allows a dealer to send remanufactured failed parts ("cores") back to a supplier to recover the "core value" deposit. With the new Parts Recovery System, a Dealer can now initiate Reman Returns using the Dealer Daily portal, instead of sending CRCR forms. Starting in the Reman Summary screen, dealers can search, create, pack and ship Reman returns. Core suppliers can also use PRS to accept or reject Reman parts received, and process payment more rapidly than with the previous system.

1. From the *Dealer Daily Home* screen, click on the **Parts Recovery System** application located under the Parts Silo.

2. The *Parts Return Request Summary* screen displays. Select the Reman view.

Create a Dealer Initiated Reman Return

3. Click the **New** button and complete the required fields in the pop-up window.
4. If needed, validate parts entered by clicking the adjacent **Go** button.
5. Once all entrees are complete, click the **Add Part** button to enter a part into the Parts List. Numerous part numbers for a Supplier can be entered.
6. Once all parts are entered, click the **Submit** button. A confirmation displays.

For Additional Questions, Please contact the *Dealer Application Support Group* at: 877-DL-DAILY (353-2459)

Remanufactured Parts Core Return Procedures

Revised 10/10/08

7. Once the Dealer has initiated the return and verified the parts are ready for return, locate the request in the Reman summary screen and click the  button.

Ship Parts - Step 1 – Select Parts to be Packaged

8. From *Step 1 - Select Parts to be Packaged*, in the Pending Parts List, click the check box ☒ in front of the desired part number(s) to be returned in one box.
9. If all parts can be returned in one box, click the [check all](#) link. To deselect all, click the [uncheck all](#) link.
10. Once selected, click the  button. This action groups all selected parts into a box for shipment. PRS moves the parts from *Step 1 – Select Parts* to the *Step 2 - Select a Carrier* section, adding a box number to the part information.
11. To move a part back to the *Step 1* section, click the adjacent  icon.

Ship Parts - Step 2 - Select a Carrier

12. From the Ship action buttons, select the desired carrier to ship the parts. If Roadway is selected, the "Liftgate Service required for pickup?" pop up displays. Click "OK" if the answer is yes, and "Cancel" if the answer is no.
13. The shipping label displays with a 1D barcode. The additional page(s) contain the shipping manifest. (Note: The manifest must be included with the shipping label when sending the cores back to the supplier).
14. **Contact UPS to schedule any small item pickups** – the system does not automatically contact UPS for a packages less than 150 lbs. (Roadway pickups are scheduled automatically.)
- Note:** For Reman returns, only UPS, Roadway, and Other shipping methods can be selected. UPS - LTL cannot be selected, and therefore that button is grayed out. Dealer pays shipping expenses for **all** shipments processed via "Other".

Ship Parts - Step 3 – Place Paperwork in Shipping Sleeve

- Note:** PRS has eliminated the need to complete the various CRCR forms previously required – with one exception: The **Automatic Transmission Diagnostic form** still needs to be manually completed and included in the shipping sleeve.
15. All paperwork including the manifest should be placed in a plastic shipping sleeve and attached to the outside of the box, with the shipping label on top (page 2 of the printed paperwork). After the carrier accepts shipment and notifies PRS, the shipment status in PRS will automatically change from Pending to Shipped.
16. If a carrier rejects shipment, click the  button and select another carrier.

Additional Functionality

17. To create an email request, select the desired record and click the  button.
- (Note: Please include a contact name and phone number in the comment field).

Remanufactured Parts Core Return Procedures

Revised 10/10/08

SECTION I GENERAL PRODUCTS OVERVIEW

These instructions apply for the following product cores:

- | | | |
|-------------------|------------------------------|------------------|
| • A/C Compressors | • A/C Compressor with Clutch | • Brake Calipers |
| • Clutch Discs | • Alternators | • Clutch Covers |
| • Starters | | |

To assure core credit, these cores must be:

- Complete, fully assembled, not damaged or broken.
- Removed from a Toyota U.S. market application vehicle.
- Returned in the original Genuine Toyota Remanufactured box. New box returns are allowed under certain p/n restrictions.
- When a reman product is used in a warranty repair, the yellow Toyota Warranty Parts tag (Tag: 00404-PRETN-TAGS) must be completed and attached to the core; these cores will receive credit regardless of their condition.

Dealers will receive core credit, unless a core is inspected and can be described under any one of the following core rejection explanation codes:

CODE 1 Not returned in a Genuine Toyota remanufactured or new part box. Please follow the guidelines below:

Cores will be eligible for acceptance when returned in the reman or new box for:

- A/C Compressors, A/C Compressor with Clutch, Alternators, Starters
- Brake Caliper part numbers: 47730-06030, 47750-06030, 47730-33111, 47750-33111

Cores will be eligible for acceptance when returned in the reman box only for:

- Brake Calipers
- Clutch Discs*
- Clutch Covers*

CODE 2 Disassembled

Toyota accepts only fully assembled cores.

CODE 3 Damaged / Broken

Examples include dents, cracks, chips, abrasions, (water/chemical) corrosion and (fire) burned housings. Broken bleeder screws, damaged internal threads on caliper body or any wear damage on a caliper body from contact with the rotor. Clutch discs with friction material mounting area damage or rubber torsion spring damage in hub. Deep grooves on clutch cover surface or springs. Alternator in which the shaft does not rotate. A/C compressors with damaged front housings (snap ring slot).

CODE 4 Incomplete / Missing Components

Examples include starter without its solenoid, alternator without pulley, A/C compressor without a sensor, caliper without piston, missing bolts, or clutch disc missing rubber torsion springs due to damage/force. Compare the core with a reman unit to make sure nothing is missing.

CODE 5 Non-Genuine Toyota Core or Part # No Longer Valid for Core Credit.

Examples would be a core for other than Toyota U.S. market applications, Delco Remy Alternators returned in new boxes, or reman clutches that are no longer valid for core credit.

***Important! Specific reman clutch cover and clutch disc part numbers are sold without core value. All water pumps are sold without core value. Toyota will NOT ACCEPT these part numbers for the reman core value. Only those part numbers that the core value was charged for will be eligible for core value reimbursement. For a list of reman no core value part numbers, refer to the "Core Part Numbers and Core Values" Section (next page). If any of these part numbers are returned, they will be rejected using the Core Rejection Code 5.**

■ FOR A/C COMPRESSORS ONLY

CODE 6 Missing shipping plates or not securely attached

The metal covers/plastic caps that protect the service valve mounting area were not returned mounted on the core or were not securely bolted down. These shipping plates prevent compressor contamination and protect the service valve sealing area from physical damage.

Important! Any core that is rejected receives no core or scrap value and will not be returned. Therefore, it is your responsibility to ensure cores conform to these guidelines, prior to shipping.

Remanufactured Parts Core Return Procedures

Revised 10/10/08

CORE VALUES

Product Type	Core Value	Comments/Exceptions
A/C Compressors, A/C Compressor with Clutch	\$20.00	Use for all reman brake caliper cores The following part numbers are SOLD WITHOUT THE CORE VALUE, please do not return these cores: 31210-12063-84 31210-12100-84 31210-14080-84 31210-14121-84 31210-14130-84 31210-14150-84 31210-16071-84 31210-16090-84 31210-19015-84 31210-20130-84 31210-23012-84 31210-24010-84 31210-28030-84 31210-30140-84 31210-32010-84 31210-32050-84 31210-32071-84 31210-32091-84 31210-36029-84 31210-60011-84 31210-60021-84 The following part numbers are SOLD WITHOUT THE CORE VALUE, please do not return these cores: 31250-12081-84 31250-12111-84 31250-12154-84 31250-14010-84 31250-16012-84 31250-16031-84 31250-17020-84 31250-17030-84 31250-20132-84 31250-22042-84 31250-30330-84 31250-32032-84 31250-35050-84 31250-35110-84 31250-35140-84 31250-35234-84 31250-35270-84

Alternators — Internal Fan (INT. FAN)	\$30.00	
Brake Calipers	\$20.00	
Clutch Covers	\$7.00	
Clutch Discs	\$6.00	Water pumps are sold without core value, please do not return these cores
Starters — Gear Reduction (GR. RED)	\$30.00	
Starters — Conventional (CONV.)	\$20.00	
Water Pumps		
TCCS/ECU Computer	\$100.00	
EFI Computer	\$100.00	

Remanufactured Parts Core Return Procedures

Revised 10/10/08

■ CORE VALUES

Product Type	Core Value	Comments/Exceptions
Combination Meter	\$30.00	
Digital Speedometer	\$30.00	
Digital Speedometer/Tachometer	\$30.00	
ECT Computer	\$100.00	
Fuel Gauge	\$30.00	
Fuel/Temperature Gauge	\$30.00	
Tachometer	\$30.00	
Temperature Gauge	\$30.00	

■ RETURN PROCEDURE

Please refer to the PRS-Remanufactured Parts Core Return (QRC) at the beginning of this section for summarization of procedures.

◆ WARRANTY GROUP 2 CORES:

1. You will receive via Dealer Daily a Toyota Part Return Summary Report and Toyota Part Return Tags, which will instruct you to ship these cores to the Toyota Parts Recovery Center in Torrance, California.
2. The Toyota Part Return Summary must be included in the shipment.
3. Ensure each warranty core is identified with a completed yellow Warranty Parts Tag (M/N 00404-PRETN-TAGS) and that the Warranty Parts Recovery Tag is attached to it.
4. For detailed information regarding the Warranty Parts Recovery Program, refer to the Warranty Policy and Procedures Manual.

SECTION II COMPUTERS

These instructions apply to Engine Computer cores only:

- TCCS/ECU Computer (89661 & 89666 prefixes)
- EFI Computer (89561 prefix)

■ ENGINE COMPUTER CORE REJECTION EXPLANATIONS

To assure core credit, all cores must be:

- Returned in the original Genuine Toyota Remanufactured computer box.
- Complete — never opened or disassembled, not damaged in any way, and no evidence of overheating, short-circuit, corrosion or water/chemical intrusion.
- Removed from a Toyota U.S. market application vehicle, a part number in the current reman program and Denso manufactured.
- When a reman computer has been used in a warranty repair, the yellow Toyota Warranty Parts tag (M/N 00404-PRETN-TAGS) must be completed and attached to the core; these cores will receive credit regardless of their condition.

Dealers will receive 100% core credit, unless a core is inspected and can be described under any one of the following core rejection explanation codes:

CODE 1 Not returned in the Genuine Toyota remanufactured computer box

CODE 2 Disassembled/Attempt to open computer/Parts missing

Toyota accepts only fully assembled cores. Do not attempt to open the housing. Any noticeable attempt/effort to open the computer or submission of a computer with missing parts will forfeit the core value credit.

CODE 3 Damaged housing (dents, deep scratches, broken terminals)

The computer housing has physical damage or evidence of abuse such as impact damage, dents, deformity or connector terminals are bent or broken off.

CODE 4 Burnt Terminals/Signs or smells of overheating

The computer has evidence of overheating such as discoloration of the connector terminals or housing, plastic holders around the terminals have melted, and/or computer smells of burnt circuit boards, solder or insulation.

CODE 5 Corroded Terminals/Signs of water intrusion or damage

Terminals have evidence of rust or residual water damage. Housing or terminals have evidence of water submersion/contact (usually white chalky residue or rust).

CODE 6 Non-Genuine Toyota core/Not in reman program

Core has been modified/rebuilt/remanufactured by the aftermarket or with aftermarket parts. Core is not from a Toyota U.S. market application or is not in the current reman program (example Fujitsu-Ten computers are not in the reman program).

CODE 7 Other

Explanation will be written in for unusual circumstances that render the computer non-remanufacturable, that is not covered in the above codes.

Important! Any computer core that is rejected has no core value and will not be returned to the shipper, unless previously requested in PRS. Therefore, it is your responsibility to ensure the cores conform.

Cores removed from vehicles involved in traffic accidents where there is obvious physical damage are not acceptable. When using a remanufactured computer for a vehicle involved in a traffic accident, charge the outright price and not the exchange price.

Core credit is given on a one-for-one purchase basis. YOU MUST RETURN CORES IMMEDIATELY AFTER REPLACEMENT. Do not hold for warranty inspection. There is no minimum weight or quantity required for return.

Remanufactured Parts Core Return Procedures

Revised 10/10/08

■ FORMS REQUIRED

Description	Material Number	Quantity Unit Pack	Maximum Order Quantity
EFI/TCCS Core Information Tag	00128-00707-19	1	5

■ RETURN PROCEDURE

1. Completely fill out the EFI/TCCS Core Information Tag and place it in the remanufactured computer box.
2. Put the core in the anti-static plastic bag that came with the reman computer. Remove the orange Engine Computer Return Address Label (to DMTN) from the box. Put the bagged core in the box and tape securely.
3. Affix your PRS UPS shipping on each box.

NOTE: Cores that are not received within 30 days of the repair date will result in a debit of the related warranty claim.

Important! Computer cores are very delicate and must not be returned with non-computer cores.

These instructions apply to Miscellaneous Computer cores only:

- | | |
|---|--|
| <ul style="list-style-type: none">• Combination Meter• Digital Speedometer• Digital Speedometer/Tachometer• ECT Computer | <ul style="list-style-type: none">• Fuel Gauge• Fuel/Temperature Gauge• Tachometer• Temperature Gauge |

■ MISCELLANEOUS COMPUTER CORE REJECTION EXPLANATIONS

To assure core credit, all cores must be:

- Returned in the original Genuine Toyota Remanufactured computer box.
- Complete — never opened or disassembled, not damaged in any way, and no evidence of overheating, short-circuit, corrosion or water/chemical intrusion.
- Removed from a Toyota U.S. market application vehicle, a part number in the current reman program and Denso manufactured.
- When a reman computer has been used in a warranty repair, the yellow Toyota Warranty Parts tag (M/N 00404-PRETN-TAGS) must be completed and attached to the core; these cores will receive credit regardless of their condition.

Dealers will receive 100% core credit, unless a core is inspected and can be described under any one of the following core rejection explanation codes:

CODE 1 Not returned in the Genuine Toyota remanufactured computer box

CODE 2 Disassembled/Attempt to open computer/Parts missing

Toyota accepts only fully assembled cores. Do not attempt to open the housing. Any noticeable attempt/effort to open the computer or submission of a computer with missing parts will forfeit the core value credit.

CODE 3 Damaged housing (dents, deep scratches, broken terminals)

The computer housing has physical damage or evidence of abuse such as impact damage, dents, deformity or connector terminals are bent or broken off.

CODE 4 Burnt Terminals/Signs or smells of overheating

The computer has evidence of overheating such as discoloration of the connector terminals or housing, plastic holders around the terminals have melted, and/or computer smells of burnt circuit boards, solder or insulation.

CODE 5 Corroded Terminals/Signs of water intrusion or damage

Terminals have evidence of rust or residual water damage. Housing or terminals have evidence of water submersion/contact (usually white chalky residue or rust).

CODE 6 Non-Genuine Toyota core/Not in reman program

Core has been modified/rebuilt/remanufactured by the aftermarket or with aftermarket parts. Core is not from a Toyota U.S. market application or is not in the current reman program (example Fujitsu-Ten computers are not in the reman program).

CODE 7 Other

Explanation will be written in for unusual circumstances that render the computer non-remanufacturable, that is not covered in the above codes.

Important! Any computer core that is rejected has no core value and will not be returned to the shipper, unless previously requested in PRS. Therefore, it is your responsibility to ensure the cores conform.

Cores removed from vehicles involved in traffic accidents where there is obvious physical damage are not acceptable. When using a remanufactured computer for a vehicle involved in a traffic accident, charge the **outright price and not the exchange price.**

Core credit is given on a one-for-one purchase basis. YOU MUST RETURN CORES IMMEDIATELY AFTER REPLACEMENT. Do not hold for warranty inspection. There is no minimum weight or quantity required for return.

■ FORMS REQUIRED

Description	Material Number	Quantity Unit Pack	Maximum Order Quantity
Digital Meter Core Information Tag	00128-00707-18	1	5
ECT Core Information Tag	00128-00707-20	1	5

Remanufactured Parts Core Return Procedures

Revised 10/10/08

■ RETURN PROCEDURE

1. If you are returning an ECT computer, completely fill out the ECT Core Information Tag. If you are returning a Digital Meter computer, completely fill out the Digital Meter Core Information Tag. Place the tag in the remanufactured computer box.
2. Put the core in the anti-static plastic bag that came with the reman computer. Put the bagged core in the box and tape securely.

NOTE: Cores that are not received within 30 days of the repair date will result in a debit of the related warranty claim.

Important! Computer cores are very delicate and must not be returned with non-computer cores.

SECTION III AUTOMATIC TRANSMISSIONS

These instructions apply to automatic transmissions.

To assure core credit, all cores must be:

- Complete assembled ATM core, not missing any components.
- Genuine Toyota parts that are part of the reman program.
- Returned in the Genuine Toyota Remanufactured ATM shipping container.
- When a Reman ATM has been used in a warranty repair, the yellow Toyota Warranty Parts Tag (tag: 00404-PRETN-TAGS) must be completed and attached to the core.

Dealers will receive 100% core credit, unless a core is inspected and can be described under any one of the following core rejection explanation codes:

CODE 1 Not returned in the Genuine Toyota remanufactured ATM container

CODE 2 Disassembled or partially disassembled core or missing major components

Disassembled or partial disassembled cores or missing major components such as the valve body, torque converter, differential assembly, transfer case, oil pump, etc.

CODE 3 Non-Genuine Toyota core

CODE 4 Externally damaged core

Damage to the case, differential or transfer case resulting from an external force such as a vehicle accident (deformation, cracks, holes, etc)

CODE 5 ATM model not part of Reman program

CODE 6 ATM core not from the vehicle being repaired

Core received is not the core from the vehicle being repaired (junk yard core, or other vehicle).

Important! Any automatic transmission core that is rejected has no core or scrap value and will not be returned to the shipper, unless requested through PRS. Therefore, it is your responsibility to ensure that cores conform.

ATM CORE VALUES

Product Type	Core Value
Front Wheel Drive 4 x 2 or Full Time 4 Wheel Drive without transfer case	\$1,000.00
Full Time 4 Wheel Drive with transfer case	\$1,400.00
Rear Wheel Drive 4 x 2 or Rear Wheel Drive 4 x 4 without transfer case	\$1,000.00
Rear Wheel Drive 4 x 4 with transfer case	\$1,400.00

Core credit is given on a one-for-one purchase basis. YOU MUST RETURN CORES IMMEDIATELY AFTER REPLACEMENT. Do not hold for warranty inspection. There is no minimum weight or quantity required for return.

CORE PREPARATION

1. Completely drain all applicable fluids from the core (e.g. transmission, differential, transfer case).
2. Transfer all plastic/rubber shipping plugs from the Reman ATM to the correct holes in the core.
3. Secure the torque converter to the ATM case using the bracket and bolts supplied with the Reman ATM.
4. Return the following parts attached to the core:
 - Torque converter
 - Speed sensor or governor assembly
 - Throttle cable and wiring harness
 - Breather assembly
 - Differential assembly (Front Wheel Drive models)
 - Left side engine mounting bracket (Front Wheel Drive models)
 - Transfer case (4 x 4 models) if the reman unit was supplied with a transfer case.

Remanufactured Parts Core Return Procedures

Revised 10/10/08

■ FORMS REQUIRED

Please Note: Genuine Toyota Reman ATM products come with a special oil resistant, re-sealable envelope which contains the paperwork you need for the return. If additional forms are required, they can be ordered from the Material Distribution Center (MDC) free of charge.

Description	Material Number	Quantity Unit Pack	Maximum Order Quantity
Core Preparation/Return Checklist for Parts Department	00108-01040-P04	1	10
Core Preparation/Return Checklist for Service Department	00108-01040-S98	1	10
Reman ATM Envelope (complete with the above forms)	00108-01080-04	1	5
Reman ATM Envelope (empty)	00108-01080-04MT	1	5

■ RETURN PROCEDURE

1. Open the Reman ATM Envelope and remove all the forms.
2. Inspect the core for damage or missing components. Prepare the core for return. (Refer to the core preparation/return checklists for service and parts).
3. Complete all the sections of the ATM Core Information/Credit Request (CI/CR) form. Service Department information should be provided on the hard copy of the Repair Order. If the Reman ATM is sold wholesale, obtain information at the time of delivery. In the Parts Department section, fill in your dealer code and name, return date and check your region box. Determine which type of ATM core you are returning and check the appropriate box. Use only one form per core. Put the top four copies into the envelope. If you are a GST or SET dealer, mail the pink copy to your Distributor, attention Parts Manager. Keep the goldenrod copy for your records.
4. Use Roadway when selecting carrier in PRS. If you require a liftgate to load your core, you can request it during your PRS return request. Insert a copy of the bill of lading into the shipping envelope and stick to the outside of the container.

Important! Please return one core per AR6 tracking number.

5. Seal the envelope and, using the wire, attach the envelope to the top of the core bellhousing. Make sure the envelope and its contents will not be damaged by leaking fluid.
7. Seat the core properly and secure the top and bottom sections of the container by stretching the rubber straps and fasten the hooks.

Important! Cores that are not received within 30 days of the repair date will result in a debit of the related warranty claim. Remember, the availability of Remanufactured Automatic Transmissions depends on the prompt return of your cores.

SECTION IV RACK AND PINION

These instructions apply to power rack and pinion cores only.

To assure core credit, all cores must be:

- Returned in the original box in which the reman rack came in order to be eligible for core credit.
- Complete and fully assembled.
- Genuine Toyota parts that are part of the reman program.
- When a reman rack and pinion is used as a warranty replacement for a Toyota reman rack and pinion, the yellow Toyota Warranty Parts Tag (tag: 00404-PRETN-TAGS) must be completed and attached to the core; these cores will receive credit regardless of their condition.

Dealers will receive core credit, unless a core is inspected and can be described under any one of the following core rejection codes:

CODE 1 Not returned in a Genuine Toyota remanufactured part box

CODE 2 Disassembled

Toyota accepts only fully assembled cores. If the rack has been disassembled, please re-assemble with all parts included to be eligible for the core value reimbursement.

CODE 3 Incomplete/Missing components

Examples are racks returned missing the rack ends, rack gear, pinion/control valve, hydraulic lines or solenoid.

CODE 4 Damaged/Broken/Cracked housing

Examples include damage such as dents, deep scratches, cracks, deformity, fire damage, overheating, bends or kinks on the rack gear, rack housing, pinion/control valve housing, hydraulic lines or solenoid. Carefully inspect racks removed from vehicles involved in accidents.

CODE 5 Non-Genuine Toyota core/Not in Toyota reman program

Examples include cores for other than Toyota U.S. market applications, or cores that are not offered as a Genuine Toyota reman rack & pinion. Core must be removed from vehicle being repaired and the same part number (series or consolidation) as the reman part purchased.

Example: Reman rack p/n 44250-32200-84, application 1987-1991 Camry. The only cores that can be eligible for return are the same application p/ns 44250-32070, 44250-32071, 44250-32072 or 44250-32200.

CODE 6 Rusted or pitted rack gear

Examples are corrosion, rust, pitting, scratches or bends on the rack gear shafts or rack ends. Carefully inspect all racks, especially Tacoma/T100/4Runner/Tundra/Sequoia applications inside the bellows for these conditions.

CODE 7 Stripped port threads

Examples include damage such as cracks, stripped threads, cross-threaded threads in or around the hydraulic ports in the rack housing or pinion/control valve housing.

Important! Any rack and pinion core that is rejected has no core or scrap value and will not be returned to the shipper, unless requested through PRS. Therefore, it is your responsibility to ensure that the cores conform.

Remanufactured Parts Core Return Procedures

Revised 10/10/08

■ RACK AND PINION CORE VALUES

Product Type	Core Value
Power Rack & Pinion	\$150.00

Core credit is given on a one-for-one purchase basis and same core application as reman part purchased. You must return cores immediately after replacement. There is no minimum weight or quantity required for return.

■ FORMS

Description	Material Number	Quantity Unit Pack	Maximum Order Quantity
Oil Pressure Check Procedure for Power Steering Pump	00108-02020-95	1	5

■ RETURN PROCEDURE

1. Please refer to the PRS-Remanufactured Parts Core Return (QRC) at the beginning of the remanufactured section.
2. Have the service department drain all of the oil out of the rack core. Place the core into the box and use cardboard or newspapers as padding to protect the core. Securely seal the box with tape.
3. Affix the label to the outside of the box.

SECTION V CV AXLES

These instructions apply to CV axle cores only:

To assure core credit, all cores must be:

- Returned in the original Genuine Toyota Remanufactured CV axle box.
- Complete and fully assembled.
- Genuine Toyota parts that are part of the reman program.
- When a reman CV axle has been used in a warranty repair, the yellow Toyota Warranty Parts tag (M/N 00404-PRETN-TAGS) must be completed and attached to the core; these cores will receive credit regardless of their condition.

Dealers will receive core credit, unless a core is inspected and can be described under any one of the following core rejection explanation codes:

CODE 1 NOT RETURNED IN THE GENUINE TOYOTA REMANUFACTURED CV AXLE BOX

CODE 2 DISASSEMBLED

Toyota accepts only fully assembled cores. If the axle has been disassembled, please re-assemble with all parts included to be eligible for core value reimbursement.

CODE 3 INCOMPLETE CORE / MISSING COMPONENTS / MISSING CV OUTER JOINT

The core should not be missing any components such as the outer joint or inner joint or any of the components in these joints.

CODE 4 BROKEN OR BENT SHAFTS

The CV shaft is broken or bent showing damage which is indicative of an impact or accident that would not be seen on a shaft removed from a vehicle under a normal repair and replace situation.

CODE 5 NOT IN REMAN PROGRAM

Core is not from a Toyota U.S. market application or is not in the current reman program. Core must be removed from vehicle being repaired.

Important! Any CV axle core that is rejected has no core or scrap value and will not be returned to the shipper, unless previously requested in PRS. Therefore, it is your responsibility to ensure the cores conform.

■ CV AXLE CORE VALUES

PRODUCT TYPE	CORE VALUE
CV axle	\$75.00

Core credit is given on a one-for-one purchase basis. **YOU MUST RETURN CORES IMMEDIATELY AFTER REPLACEMENT.** Do not hold for warranty inspection.

■ RETURN PROCEDURES

Please refer to the PRS-Remanufactured Parts Core Return (QRC). Please use program type "CV Axles", core type "CV Axles", warranty/customer paid "CP".

Toyota Vehicle Identification Chart*

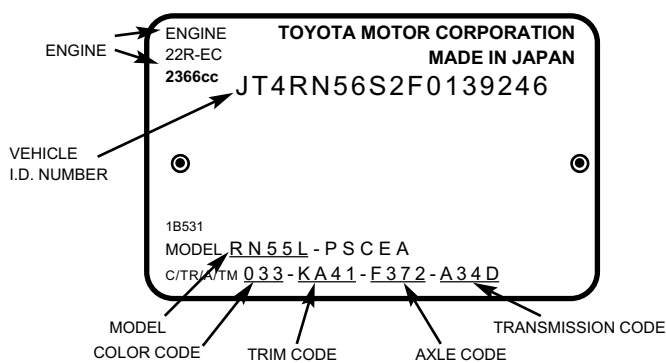

* The following charts illustrate major Toyota body changes only. They are not meant to show every model.

VEHICLE ID CHART

VIN LOCATION INFORMATION

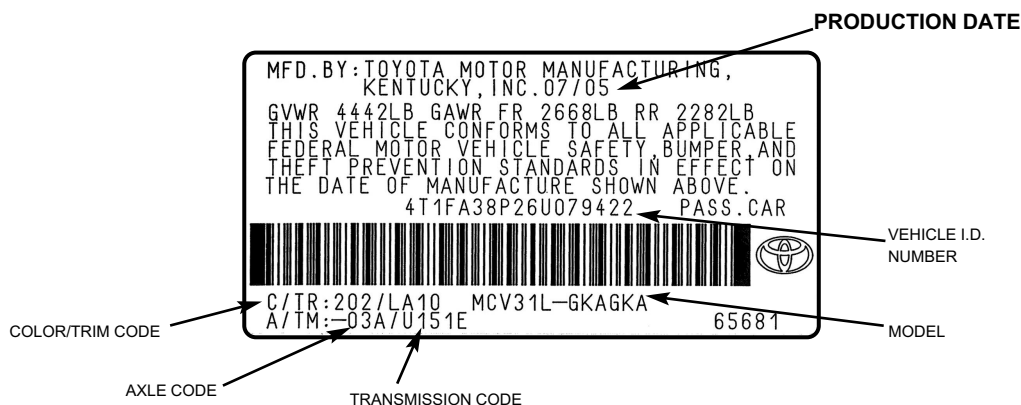

To determine the correct part number needed, it may be necessary to know the production date, model number, and engine number. The production date, model number and engine number can be found on the identification plate or label located as noted below.

For Vehicles Prior to 1989 (Plate)

On the passenger Cars, Trucks and Land Cruisers, the I.D. *Plate* is located on or adjacent to the firewall within the engine compartment. On Vans, the *Plate* is located on the body, under a carpet flap directly below the front of the front passenger seat.

For Vehicles 1989 to Current (Label)

On Passenger Cars, the I.D. *Label* is located on the inside of the driver's door. On trucks, Vans and Land Cruisers, the *Label* is located on the lower part of the driver's door pillar.
