What's New in eXact learning version 10

It's increasingly important to develop and store learning content in such a way that it can be used – not just in a static, blended approach to learning but also in a dynamic way that is able to repackage itself, interoperating with media and the organization's skills based personalization systems.

Learning Content Management Systems (LCMSs) show significant ROI when correctly coupled with learning management systems (LMSs) to manage learning content production and procurement initiatives in large organizations.

At the same time learners are becoming used to accessing learning content that's personalized to their needs as and when they need it. Learning content personalization has to take into account the learner's background and skills. The learning content needs to be tailored to:

- the device that the learner is using,
- the location,
- the context and
- the learner's learning preferences

Managing the Learning Content Ecosystem

eXact learning LCMS, the leading learning content management system, delivers personalized and dynamic learning experiences for today's workforces. This learning content is tailored to the device the learner is using; the location; the context, and the learner's learning preferences.

eXact learning LCMS is currently installed in over 100 organizations worldwide and it was named the 2012 Best of Elearning! award winner as the **Best Learning Content Management System**.

The newly released eXact learning LCMS version 10 is now available and includes a unique list of new features, which can help your organization manage change towards learning personalization:

- **XPRE – XML-based Processor Rendering Engine**: customize Learning Objects' style and provide alternative output to support multiple learning channels from a single source
- **Review module**: comment material and easily involve "reviewer" in the authoring process
- **Content localization**: an easy way to manage content localization by using external translators
- **'Open', 'Closed' & 'Isolated' domains**: third party content producers can access virtual domains that are separated from the rest of the organization
- **Online Editor in a SaaS paradigm**: the ability to integrate the Online Editor with external applications to create an easy-to-use authoring environment
- **Search engine**:
  - Full-text search: search materials based not only on their metadata but also on specific text included
  - Additional materials' search: quick and simplified search feature to improve the reuse of materials
- **Content management**: easy retrieval of information and most frequent actions
- **Folder-like view of project and domain materials**: an easy way to manage hierarchical and empty tags for more intuitive organization of project materials
- **Dashboard available for any user role**: a new cross-domain dashboard involving learners as well as authors and administrators
- **SCORM 1.2 proxy package**: an easy way of integrating a third party LMS without specific network deployment and development of SW integration code
- **LMS functionalities**: a new way to manage, present and deliver learning content within an integrated LMS

eXact learning solutions

eXact learning solutions

eXact learning solutions, formerly Giunti Labs, is a leading online and mobile learning content management and digital repository solutions provider, offering a wide range of tools and services for content development, management and delivery, covering:

- Learning content management solutions
- Multi-language bespoke learning content production
- Mobile learning technologies
- Consulting and professional services

The company has over fifteen years of experience and more than 100 clients worldwide. Our technological innovations allow enterprises to improve their organizational performance, and achieve significant reductions in business costs.
